

Service Ladder, Resting Platforms and Safety Line

Service/Emergency Ladder.

This modular aluminum ladder is available for service or emergency access. It is attached to the mast and is accessible from the top or the bottom of the cabin. The ladder guarantees access to the nacelle and the tower base.

Resting Platforms.

Resting Platforms are attached to the ladder and mast allowing the users a safe and comfortable resting platform. The platforms are made of metal and are typically placed every 15 to 25 feet.

Safety Line.

Safety Lines run parallel to the ladder and provide an additional safety element to the equipment. The line is permanently attached to the top and the bottom of the ladder with intermediate supports and tension controls.
